Ship with caveat.

Real benefit-side lift, but smaller than half the pre-registered MDE.

TL;DR

SHIP WITH CAVEAT. **Ship — but the effect is smaller than the pre-registered MDE/2. Document and revisit.**

Lift of +1.83pp is real (CI excludes zero) but below half the pre-registered MDE. The effect is real but the business case may not clear the per-user cost.

WHAT WE'D DO NEXT

Ship. The effect is real but small — document in the readout that the per-user impact is below the pre-registered MDE/2, and use it to inform the next iteration.

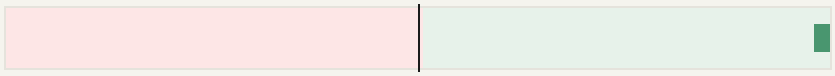

GUARDRAILS

Guardrail clear.

The pre-registered guardrails are revenue and (where wired) latency. None crossed their harm thresholds.
